## Actual News about [Large Format Printing](#)

A free of charge information service

Distributor: CREAT, Hamburg

Published by: Neun Punkt GbR, Hamburg

---

2001-05-18

Dear readers,

we are aware that not each of you was able to visit CeBIT this year, even if it was again a show of superlative and LFP products were shown everywhere. But, of course this year the show seemed to be a nearly 100 % telecommunication and internet show and not everyone of the exhibitors in the large format printing hall was really happy.

But new shows will come soon, like VISCOM in Düsseldorf, and of course the LFP-Newsletter will keep you up to date. The June LFP Newsletter will give you some ideas. Here comes the second release and we hope you find all information valuable. Again, the LFP-Newsletter is a free of charge market information service, so it is open for you too. Whenever you like to publish information about your products, your company, personal changes, etc. do not hesitate to send it to the below mentioned e-mail address. Even sponsors are still welcome.

### Headlines

1. **Jack the RIP – new version 2.0**
  2. **ColorSpan – no more secrets**

### **Jack the RIP – new version 2.0**

MACRON introduced a totally new GUI (graphic user interface) for their large format RIP, Jack the RIP. The production RIP is controlled via a browser. So access is very fast and very simple and there is no problem with integration of Mac and Linux operation systems. Additional functions give more flexibility to the network version of Jack the RIP.

### **ColorSpan – no more secrets**

A totally new printer was shown by MacDermid ColorSpan at CeBIT 2001. The name „DisplayMaker Mach 12“. DisplayMaker Mach 12 leverages speed and quality using 12 heads. People from Deutsche Messe AG saw it and just at the fairground they ordered 2 of these machines for in-house use. They will now produce banners and signs for all their activities in Hannover themselves.

### **Markzware Announces Settlement with Creativepro.com**

SANTA ANA, CALIFORNIA, March 29, 2001 Markzware today announced that it has settled the patent infringement lawsuit brought by it against Creativepro.com, Inc. in the United States District Court for the Northern District of California. In connection with the settlement, Markzware and Creativepro have entered into a Patent License Agreement under which Markzware has granted to Creativepro a non-exclusive license with respect to Markzware's U.S. Patent No. 5,963,641, entitled "Device and Method for Examining, Verifying, Correcting and Approving Electronic Documents Prior to Printing, Transmission or Recording".

The details of the terms of the settlement agreement and the license agreement are confidential, and the parties have agreed not to disclose any of the specific terms except for those stated in this press release. Markzware is the leader in developing quality assurance software for the graphic arts, publishing industries worldwide. Markzware is a privately held company with headquarters in Santa Ana, California USA. Markzware b.v. located in Rijswijk, the Netherlands, is the headquarters for activities in Europe, the Middle East, and Africa.

### **SCP now offers version 4.5 of their large format product suite**

The new release incorporates many new features, including internet capability, a new user interface and new drivers. As usual, speed and quality were again enhanced, redefining the definition of superior large format copying. We now feature an Internet-based service, which allows users of our software solutions to check for new updates and upgrades. This software can be initiated from within the product, or interactively via this link.

There is an optional online-registration as well. Each person who registers her or his SCP product is entitled to receive one of the new SCP shirts. The link for registration is the same as for the updates. SCP Software GmbH, Aachen, Germany, develops software solutions for Digital Reprographics and industrial applications. Since its foundation in 1990, SCP has released market-leading products for plotmanagement and -service, for large format and for small format color and b/w printing, scanning, archiving, editing, RIPing and copying.

### **VUTEk UltraVu 2360 SC selected by High Resolutions**

New territory of vehicle graphics printing is explored. Knoxville Tennessee based High Resolutions, a full service graphics bureau for colour printing, has installed a VUTEk UltraVu 2360 SC six-colour digital printer to broaden its scope of activities and increase efficiency. President and founder of High Resolutions, Paul Kedrow, selected VUTEk's award winning 360 dpi 2360 SC after declaring that the printer's performance 'exceeded all expectations'. Paul Kedrow sent files to key large format printer manufacturers and assessed the results obtained with each, before reaching a decision to purchase the VUTEk.

'We visited two trade shows to see what was available', he explains. 'As we are involved in much POP, retail and banner work, high-resolution imaging was a key issue for us. Also, for the outdoor media side of the business, the ability to print on a range of substrates was a high priority.'

Kedrow firmly believes that his new installation competes head on with regular ink-jet alternatives. 'Our customers are now specifying that their jobs be run on the VUTEk, purely because they appreciate that it produces high quality print at the lowest cost and avoids the need for lamination.'

VUTEk's UltraVu 2360 SC won the coveted 'DPI Product of the Year 2000' award at the annual conference of the Digital Printing and Imaging Association.

### **New warrantee for ENCAD media**

Encad offer two new media for outdoor application to be used with their large format printers: GO LumaTrans Backlit and GO Multi Purpose Vinyl. If these media are used together with GO 4 or 8 color inks, ENCAD offers the same warrantee as with all other outdoor media for up to 2 years. GO LumaTrans Backlit is a robust appr. 2,2 mm thick opaque Backlit Film for backlit displays. GO Multi Purpose Vinyl is a self adhesive vinyl for outdoor displays and floor graphics.

### **3P introduced new textil media at CeBit**

Since 1997 3P InkJet Textile AG is producing textile media for large format printing. Their motto is: "Just change the media...". So 3P's textiles are compatible with printers from Hewlett Packard, Epson, Kodak, AGFA, OCE. Textile media offers a bright range of application. One of the topics in discussion is fire protection.

3P's media were testified and Europe, Japan and USA and are certified to use also in critical environments like shows, at stages and so on. Even usage for outdoor is not more a problem. The engineering makes the difference. It's not only fabrics, it's the entire solution which brought 3P to the top position.

### **ILFORD introduced new media**

Ilford now offers a new self adhesive bond paper, Ilfojet Universal UMBP5SA, which can be used with multiple thermal ink jet printers. Also new is the Photo Grade paper UM2GP7 (glossy) and UM2SP7 (semi matt). These new photo paper will replace older media. Both offer a higher paper weight.

More: [www.ilford.com](http://www.ilford.com)

### **Driver licence at GMP**

GMP offers stabil and easy to use finishing and lamination equipment. But even ease of use machines need training. That's the reason why GMP installed their demo and training center in Polch near by Koblenz.

More: [www.gmp.com](http://www.gmp.com)

### **Professional digital printing with Canon**

At Cebit Canon presented the full range of printers and software products.

More: [www.canon.com](http://www.canon.com)

### **Onyx Graphics offers a lot of new media profiles**

Onyx offers with service pack 5.5.1 appr. 50 new profiles for Encad GO inks. ENCAD users can download from the ONYX homepage or contact their dealer.

More: [www.onyxgfx.com](http://www.onyxgfx.com)

### **Open Seminars and speeches at VisCom**

VisCom will open it's doors again from August 30 to September 1<sup>st</sup>. in Düsseldorf. Based on the very well acceptance and experience from show 2 years ago, it was decided to have all the speeches and seminars to be attend free of charge. This will offer an additional value to all the visitors. Themes and content will be displayed within the next LFP-Newsletter. A visit in Düsseldorf makes sence, please make your plan early enough. If you have already special questions and requirements, if you like to do a speech yourself, if you like the open forum as stage for product presentation, mail to the e-mail account mentioned below. For further questions regarding the show itself, visit: [www.viscom-messe.de](http://www.viscom-messe.de)

### **AGFA introduced the new Sherpa**

Compared with the former models of the Sherpa family the new AgfaJet Sherpa 62i prints up to 2.5 faster than previous models. There is also an 180 dpi mode available for very fast proofing. AGFA offers an update for owners of older models.

More: [www.agfa.com](http://www.agfa.com)

### **New dimensions in poster printing**

Ellerhold Großplakate GmbH, Zirndorf, just announced that they bought UV-Setter 1116. This system delivered by basysPrint will be installed in the poster production center in Radebeul. Ellerhold will now offer new dimensions for hexa chrome printring in format 120x162 cm.

More: [www.basysprint.de](http://www.basysprint.de)

### **VUTEk wins 2nd award**

28 companies with 108 printers attended the DIMA Digital Printer Shoot-Out competition. VUTEK won first place with it's UltraVU 2360 SC in the category „Grand Format (Inkjet Print)“. This is the second award for this printer. VUTEK already was named “product of the year” by the Digital Printing Association last year.

More: [www.vutek.com](http://www.vutek.com)

### **Demo-Center in Stuttgart was opened**

Classen Papertronic is a real full service supplier in the digital printing area. They just opened a new demo center near by Stuttgart. There the entire digital workflow from scan to finishing can be shown and trained.

More: [www.papertronics.com](http://www.papertronics.com)

### **DOBTEC introduced DayGlo inks**

The well known distributor in the LFP arena now offers fluorescent inks. DayGlo offers bright colors. While using special RIP software standard inks and fluorescent inks can be used side by side within the same document. The color space is much wider than already known color spaces with hexa- or octachrome inks.
